

Memorandum For Record

Date: August 3, 2000

From: W. Kenneth Derickson
Senior Project Manager
Zambrana Engineering, Inc.

Subject: Phone Conversation with Dan Swartzendruber

I called Dan Swartzendruber of the Planning and Zoning Department of Johnson County, IA regarding the coordination letter submitted to ZEI by Johnson County on the Coralville Environmental Assessment for the former Camp Daybreak site. In reading the letter it appeared that the county had not reviewed all the information on the MYCA proposal (Alternative #1 in the EA).

After reviewing some of the comments by the county in their coordination letter and informing Mr. Swartzendruber that this information was in the supplemental information to the initial MYCA proposal, I learned that they did not have a copy of the Supplement. I indicated that this Supplement was on the Corps web site for this project and he confirmed that he had found this information on the web site as we talked. He indicated that he would download the information and distribute copies to the appropriate people at the county.

I also informed Mr. Swartzendruber that ZEI was preparing a response to Johnson County's coordination letter, to clarify some of the issues raised and to point out that more current information was available in the Supplement that would address some of the county's concerns
