Rock Island District

Ms. Hagerty,

3-3
5-6 term
These are a few questions I would have regarding this specific camp and group, should you decide to accept this proposal: Will this land and beech be private? What sort of screening process will the guests of MYCA as well as the people they intend to market this facility to, undergo? It is concerning the short stay of the guests and the international aspect of the campers. The fact that they intend to **MARKET** this facility 42 weeks of the year poses many insurance, liability, and security issues. Currently the US classifies the men of 20 countries as "High Risk Visitors," will the young men from these countries be allowed here? I realize the sensitive nature of this question, but a plan should be addressed publicly. As much as I am sure the intent of this camp is good, we cannot overlook the disadvantages, or the security of our neighborhood and land. Realistically there are many potential targets nearby.

Thank you,

Bob Lisenbee
