OPTIONAL ADDITIONAL INFORMATION SUPPORTING NJD (e.g., discussion may include information reviewed to assess potential navigation or interstate commerce connections - 1 to 3 paragraphs):

The 0.5 acre of isolated wetlands is on that part of the property where palustrine emergent wetland will be restored / enhanced, and mesic native prairie will be restored. On another part of the property, commercial development fill will adversely impact 0.25 acre of jurisdictional wetland / stream. The wetland / prairie restoration project will provide mitigation for the commercial development project. In addition, the City of Carlisle, Iowa, will utilize the wetland / prairie restoration area for environmental education in association with a proposed nature center. The Carlisle Prairie / Wetland Nature Area will be approximately 14.5 acres in size. As a result, this project will provide substantial net benefits to wetland and wildlife habitat.

Swallows, and other migratory birds, present during site visit. Potential Indiana Bat habitat adjacent. Site provides feeding area.
