

## Table of Contents

	<b>Page</b>
Preface .....	i
Map of the Upper Mississippi River - Illinois Waterway.....	ii
1. Abstract.....	1-1
2. Introduction .....	2-1
Relationship to UMR/IWW System Navigation Feasibility Study .....	2-1
Project Overview .....	2-1
Study Design .....	2-3
Scope of Work and Tasks .....	2-4
Past Studies .....	2-5
References.....	2-5
3. Data Collection.....	3-1
Boat Trip.....	3-1
Trip on the Illinois Waterway.....	3-2
Trip on the Upper Mississippi River .....	3-5
Site Selection.....	3-5
Erosion Site Mapping .....	3-12
Field Data Sheets.....	3-15
Sampling.....	3-15
Bank Sections.....	3-22
Bank soils.....	3-22
Subaqueous Core Samples.....	3-22
Global Positioning System .....	3-23
River Cross Sectional Profile .....	3-23
Island Sites .....	3-23
Other Information.....	3-26
References .....	3-26
4. Classification Parameters and Database Structure .....	4-1
Site Location .....	4-1
Site Attributes.....	4-1
Erosion Attributes.....	4-1
Database Development .....	4-2
5. Characterization of Bank Erosion and Failure Mechanisms .....	5-1
Soil Classification .....	5-1
Bank Erosion and Failure Mechanisms .....	5-1
Bank Slopes.....	5-5
Bank Soils .....	5-8
Stage Histograms.....	5-8

References .....	5-19
6. The Illinois Waterway.....	6-1
Background .....	6-1
Prior Erosion Studies.....	6-3
Bhowmik and Schicht (1980) Study .....	6-3
Warren (1987) Study .....	6-11
Hagerty (1988) Study .....	6-11
Hydrological Conditions during Field Survey .....	6-16
Water Year 1978 .....	6-16
Water Year 1986 .....	6-17
Water Year 1987 .....	6-17
Water Year 1988 .....	6-19
The 1993 Flood .....	6-19
Water Year 1995 .....	6-19
Historical Navigation Traffic.....	6-20
Dredging History and Dredged Material Placement.....	6-22
Fleeting Areas and Mooring Sites .....	6-22
Present Study.....	6-22
Site Locations.....	6-22
Sampling at Sites .....	6-22
Site Parameters.....	6-22
Generalized Bank Types .....	6-25
General Characteristics of Selected Erosion Sites.....	6-25
Site Descriptions.....	6-47
Summary .....	6-164
References .....	6-168
7. The Upper Mississippi River .....	7-1
Introduction.....	7-1
General Site Characteristics .....	7-1
Site Selection and Data Collection Campaign.....	7-4
Individual Site Characteristics .....	7-5
Geological and Soils Investigation.....	7-13
Field Methods.....	7-21
General Site Characteristics .....	7-21
Summary of Conclusions .....	7-204
References .....	7-207
8. Conclusions .....	8-1
Summary .....	8-1
Illinois Waterway Summary .....	8-1
Upper Mississippi River Summary .....	8-4
Conclusion.....	8-6

Bank Erosion Impact Assessment Study for the Mississippi River/ Illinois Waterway.....	8-7
Scope of Work .....	8-7
River Attribute .....	8-7
Traffic Attribute .....	8-8
9. Glossary and definitions.....	9-1
<b>Appendices</b>	
Appendix A.	Upper Mississippi River System Navigation/Sedimentation Study -- Report 1 Bank Erosion Literature Study (A separate report; WES Technical Report HL-96-10, available at Rock Island District, U.S. Army Corps of Engineers)
Appendix B.	Scope of Work for Field Survey
Appendix C.	Stage Histograms and Bank Profiles for the Erosion Sites Along the Illinois Waterway and Upper Mississippi River
Appendix D.	Dredging History and Dredged Material and Training Structures
Appendix E.	Historical Traffic Volume and Fleeting Areas on the Illinois Waterway and Upper Mississippi River
Appendix F.	Particle Size Distribution on the Illinois Waterway and Upper Mississippi River
Appendix G.	Cross-Section and Corresponding UTM Coordinates of Selected Sites of the Illinois Waterway and the Upper Mississippi River Coordinates
Appendix H.	Mississippi River Geomorphology Report
Appendix I.	Field Survey Data Base
Appendix J.	Navigation Charts Marked with 1995 Field Survey Bank Conditions (On file with the Rock Island District, U.S. Army Corps of Engineers)
Appendix K.	Photographs of Study Sites on the Illinois Waterway (Photographs of the Mississippi River Sites are on file with the Rock Island District, U.S. Army Corps of Engineers)
