Subject: Proposed Muslim Camp

I wish to go on record as one opposed to the proposed Muslim Youth Camp on property near the **Coralville** Reservoir. My objection to the Camp is that it would have a long-lasting, detrimental environmental impact on the area. The area is already overtaxed environmentally. Any development that might occur must ensure little or no environmental degradation—the Camp does not—as well as actively promote a productive wildlife habitat. Until the Army Corps of Engineers and the local government can guarantee that, no further development of the area should be undertaken.
