

Maquoketa River, IA Hydraulic Modeling - Floodplain Management Services (FPMS)

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG ®

Location

Maquoketa, IA

State(s)

IA

Congressional District(s)

IA-1

Status

The communities of Manchester, Monticello, and Maquoketa are located along the Maquoketa River. New digital elevation data developed by the State of Iowa will be utilized to prepare hydrologic modeling products along with hydraulic modeling and mapping products for flood prone areas of each of these communities and throughout the watershed.

Description

This project is being accomplished by the Corps of Engineers to prepare modeling and mapping products for the watershed. These models will be the basis for floodplain management decisions by the communities, the counties and the state.

Major Work Item (This Fiscal Year)

Hydraulic modeling and rating curve has been completed through Manchester, IA.

Major Work Item (Next Fiscal Year)

Work will continue downstream of Manchester to through Monticello, IA
