

Whitebreast Creek Watershed - CAP Section 206

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG ®

Location

Whitebreast Creek Watershed is located in south central Iowa encompassing portions of Clark, Lucas, Warren and Marion counties. This 273,000-acre watershed lies within the Des Moines River drainage area, and empties into Lake Red Rock Reservoir.

State(s)

IA

Congressional District(s)

IA-3, IA-4

Status

Project has been terminated.

Description

Government Land Office surveys between 1832 and 1859 show prairie and timber accounted for 75% and 21%, respectively, of the Whitebreast Creek watershed. The pre-settlement woodland and grassland have been converted to row crops, hay, and pasture reducing the vegetation cover. The change of vegetation has led to increased surface runoff and erosion, and has contributed high sediment loads as far away as Whitebreast Bay of Lake Red Rock. Further, the Whitebreast Creek watershed has lost 98.9% of its wetlands, and has been channelized reducing channel sinuosity. Restoring wetlands to the watershed will improve wetland aquatic habitat. Selected plantings and hydrology enhancements will create high quality aquatic habitat. The scope of this project focuses on proposed project features that would improve wetland and in-stream habitats and enhance resource values. Project features will include construction of upland wetland ponds, floodplain wetland ponds and in-stream pool-riffle complexes. The project was planned for the benefit of native species of mammals, amphibians, fish, birds and migratory birds consistent with agency management goals.

Summarized Project Costs

Federal Cost	\$638,304
Non-Federal Cost	\$0
Total Cost	\$638,304
Allocations through FY 2013	\$638,304
Allocations for FY 2014	\$0
Budget for FY 2015	\$0
Balance to Complete after FY 2015	\$0
